EDUCATION

- BMS College of Engineering** Bengaluru, India
Computer Science Engineering and Data Science (UG) 2023 - 2027
- Shri Kumaran's Children Home PU College** Bengaluru, India
Pre-University (PCMC) 2021 - 2023

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, SQL, R, Java
- Data Science/ML:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, LLMs, AI/ML
- Web Development:** React.js, Node.js, Express, REST APIs, HTML/CSS
- Databases:** MongoDB Atlas, MySQL
- Tools & Platforms:** Git, GitHub, VSCode, Vercel, Render, Figma, Microsoft Office
- Concepts:** Deep Learning, Large Language Models (LLMs), Data Structures and Algorithms, Object-Oriented Programming (OOP), Web Development

PROJECTS

- Saffron Spice Restaurant Web App** Full-Stack Development
 - A full-stack restaurant platform with user authentication, booking, and pre-ordering features.
 - Developed using **React.js** (frontend), **Node.js + Express** (backend), and **MongoDB** (database).
 - Deployed on **Vercel** (frontend) and **Render** (backend), showcasing expertise in full-stack deployment.
- GST Automation Toolkit** Python Scripting
 - Developed a **Python** script to automate the extraction, cleaning, and classification of GST ledger data.
 - Utilized **pandas** and other libraries to process data from TallyPrime exports, significantly reducing manual effort.
- Titanic Dataset EDA** Data Analysis & Visualization
 - Exploratory Data Analysis project from the IBM Coursera course on the Titanic survival dataset.
 - Performed data cleaning, hypothesis testing, and correlation analysis using **Python**, **Pandas**, and **Matplotlib/Seaborn**.
- EigenLayer Restaking API (Simulation)** Backend Development
 - Simulated a REST API using **Node.js** to serve sample validator, restaker, and rewards data.
 - Demonstrated skills in backend logic, API design, and data handling for a blockchain-related concept.

CERTIFICATIONS

- IBM Exploratory Data Analysis Course** Coursera, July 2025
 - Completed coursework in data cleaning, visualization, correlation analysis, and hypothesis testing.
 - Hands-on project experience with the Titanic dataset, applying theoretical knowledge to a real-world problem.
- HTML + CSS in Depth** Meta (Coursera), July 2024
 - Completed Meta's professional course on HTML and CSS, covering semantic markup, responsive design, and accessibility.
 - Built multiple web pages and practiced modern CSS techniques for layout and styling.
- Introduction to Large Language Models** NPTEL (IIT New Delhi), Ongoing
 - Currently enrolled in NPTEL's course on Large Language Models, covering fundamentals, architectures, and applications of LLMs.
 - Learning from IIT New Delhi faculty, focusing on state-of-the-art techniques and practical implementations in AI.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **Event Coordination:**** Coordinated design, registrations, and guest management for events at BMSCE UTSAV (VISTAAR, Livewire).
- **Design Leadership:**** Led design departments (**DSYNC**), creating posters and promotional materials for events.
- **Carnatic Music:**** Professional Carnatic classical vocalist with over 75 concerts. Performed both individual and band concerts at prestigious venues.
